

## Community e-Connect – Readiness Assessment

Consider the following in determining readiness and appropriateness of undertaking CeC.

### General Considerations

Metric	Notes
<i>Condition and Intervention type</i> – rationale for selection? Are you meeting a need? Priority geographies, populations, etc. being addressed?	
<i>Alignment</i> – How does CeC align with other work / priorities / areas of focus?	
<i>Planning</i> – how do you envision utilizing CeC longer-term? Plans for expansion?	

Additional comments:

Identify potential clinical and community partners who may be candidates for CeC participation. Score each on the metrics below, including the rationale for your score and additional thoughts in the “Notes” column.

**Clinical Partners:** \_\_\_\_\_

<b>Metric</b>	<b>Score</b> (1=not at all ready; 10=very ready)	<b>Notes</b>
<i>Target patient population</i> – of a reasonable size for the target condition to warrant referrals (~10K)? Any sub-populations of interest?		
<i>Collaborative history</i> – have you worked successfully with this entity previously? Do they have a history of collaborating with outside partners? Have they worked with intended CBO previously?		
<i>Capacity and interest</i> – will the clinical partner dedicate staff time for this? Leadership bought in? History of attempting innovation?		
<i>Geography / location</i> – are partners in locations that are conducive to patients getting to and from?		
<i>Access</i> – can patients utilize public transportation, if needed, to get to the facilities?		
<i>Language</i> – do all participating organizations meet the language and cultural needs of the target population?		
<i>EMR vendor</i> – has CeC been implemented previously with the EMR utilized by potential clinical partners?		

Additional comments:

**Community-Based Organization:** \_\_\_\_\_

<b>Metric</b>	<b>Score</b> (1=not at all ready; 10=very ready)	<b>Notes</b>
<i>Target patient population</i> – does the CBO have experience serving the target population / sub-population?		
<i>Collaborative history</i> – have you worked successfully with this entity previously? Do they have a history of collaborating with outside partners? Have they worked with intended clinical partner previously?		
<i>Capacity and interest</i> – Does the CBO have capacity to handle additional referrals? Leadership bought in? History of attempting innovation and collaboration?		
<i>Geography / location</i> – are partners in locations that are conducive to patients getting to and from?		
<i>Access</i> – can patients utilize public transportation, if needed, to get to the facilities?		
<i>Language</i> – do all participating organizations meet the language and cultural needs of the target population?
